SMALL & MEDIUM ENTERPRISE

ENABLING TECHNOLOGY SERVICES IN NIGERIA

**A**s a Customer Centric organisation, we have tailored our services to suit the demands of specific customer segments. Customers who fall into the Small, Medium Enterprise (SME) can now enjoy specialized services from Galaxy Backbone. We value the contribution these small businesses make towards the development of the nation. Hence as Technology enablers, we are poised to enable their businesses using our technology services. We provide fast internet connectivity suitable for small businesses and

for residential apartments. This service is designed bearing in the mind the sort of experience clients using this service for this purpose would like to experience.

With Galaxy Express, you're assured of a maximum of 20 Mbps.

#### Benefits

- ✦ Access the latest digital connectivity and its applications
- ✦ Offers fast internet access over secured network
- ✦ Provide avenue for seamless citizen-to-citizen interactions
- ✦ Promote research and development
- ✦ Support innovation and growth
- ✦ Access to leading edge technology will help to attract new businesses

## Enterprise VVoIP

---

Hosted Voice and Video over IP for Small Medium Enterprises (SMEs) over terrestrial links.

### Benefits

- ✦ VoIP technology combines and stores data onto one single network
- ✦ It can increase the overall productivity of an organization by allowing their employees to multi-task without interruption
- ✦ Ability to concentrate on core business functions
- ✦ Automation of routine administrative functions
- ✦ Riddance of intra-site long distance expenses
- ✦ Reduced administration as well as network costs
- ✦ Effective optimization of existing resources
- ✦ Elimination of risks associated with vendor lock-in
- ✦ Simple Conference Calls
- ✦ Simplified administration in connection with telecommunications infrastructure

- ✦ Enhanced efficiency of IT resources
- ✦ Enhanced operational efficiencies
- ✦ Effectively bring together mobile and remote employees
- ✦ Add innovative features including hardware
- ✦ Reduced telecom Cost via toll by pass
- ✦ Increased mobility, ie, with the introduction of this technology, employees are no longer tied up with the phone in their offices

## Galaxy My-Wifi

---

Managed Wifi/LANs for Residential SMEs with up to 50 devices bundled with fibre or eLTE service.

### Benefits

- ✦ Mobility within the office/Residence: An internal Wi-Fi network means the end of employees being tethered to their desks to do excellent work. Internal Wi-Fi allows employees to work at their desk, in a conference room, or in any other location.
- ✦ Increased collaboration: Employees can now be located anywhere in the office or residences and still have access to key documents and information, they can work in teams or groups very easily. This can help reduce delays and enhance productivity.
- ✦ Simpler infrastructure: When your office/residence goes wireless, it's simpler to organize your staff. Desk locations, adding new employees, and office layout are no longer dictated by wires and cables (which can be quite expensive to purchase

and maintain). You probably don't want to eliminate cable

- + Guest Access: Guest access is likewise a necessary service for visitors and customers. Business partners or vendors need it for on-site meetings or project work, particularly if cellular connections within a corporate office are poor.

## SME Share Platform

This low cost shared hosting services gives SMEs the opportunity to take advantage of our shared hosting platform for their business and operations.

### Benefits

Key benefits of this service are as follows:

- + This service provides a secure, scalable and reliable platform for creating, developing and maintaining an online presence.
- + Customers can use this for information dissemination, provision of transactional services and interacting with their own customers, citizens and other stakeholders
- + Disaster recovery in case of incidents or faults

## Galaxy Express

High speed Internet access (< 45 mbps), terrestrial last mile, protected private or NATed IP addresses.

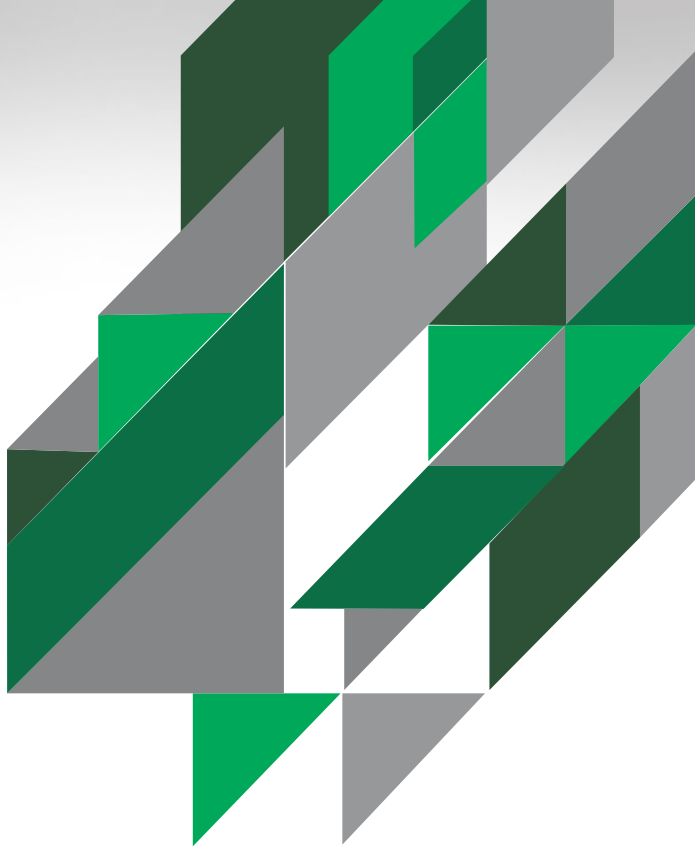

## UltraPlus Internet

---

### Benefits

- ✦ Provision of dedicated & fast internet connection: With managed internet access, you get dedicated bandwidth.
- ✦ Increased Productivity: Saves you time and gives you good value for your money.
- ✦ Flexibility and Scalability: It caters to any expansion plans. Installing managed internet access will cater for any expansion that might happen in the future. Regardless of how big your business grows, you will always have efficient internet speed.

It provides better collaboration within the network coverage
