

# SERVICES FOR **Large** Enterprise

Large corporate organisations are assured of technology services from our state of the art Technology Infrastructure. They can also take advantage of our network spread across the country. These Infrastructures have been built to handle the peculiar requirements of organisations like yours.

## UltraPremium Internet

High speed Internet access (> 45mbps), terrestrial last mile, unprotected, live IP addresses.

### Benefits

- Provision of dedicated internet connection: With managed internet access, you get dedicated bandwidth.
- Saves you time and an assured value for your money.
- It caters to any expansion plans: Your internet speed will become worse if you use regular business broadband and your internet is already slow. Installing managed internet

access will cater for any expansions that might happen in future. Regardless of how big your business grows, you will always have efficient internet speed

- It provides better collaboration within the network coverage

## Back-Up for Enterprise

Disaster recovery (DR) and business continuity from Galaxy's Abuja and Enugu Data Centres/Contact center and customizable operational locations.

## Benefits

- Drastic reduction of restore times and lower fault clearance time
- Limit the losses due to revenue reduction or other costs

- Minimize the interruption of Critical Processes and safeguard business operations
- Increase reliability of the system due to reliable recovery mechanism
- Helps to attract more confidence on the ability to resume operations after incidental loss of data

## WebApp Hosting For Enterprise

This is a shared web and application hosting for Enterprises. This service provides a secure, scalable and reliable platform for creating, developing and maintaining online presence. Organisations can use this for information dissemination, provision of transactional services and interacting with their own customers, citizens and other stakeholders

## Benefits

- Provide high speed bandwidth with ability to dynamically expand based on defined hosting polices
- Be able to host variant databases for different applications
- Can accommodate hosting of email accounts
- Offers reliable disaster recovery capabilities

## VPS Hosting for Enterprise

Dedicated Virtual Private Server for Enterprises.

## Benefits

- Provides a secure, scalable and reliable platform for creating, developing and maintaining an online presence.
- Provide high speed bandwidth with ability to dynamically expand based on defined hosting polices
- Be able to host variant databases for different applications
- Can accommodate hosting of email accounts
- Offers reliable disaster recovery capabilities
- Provides you with more disk space, CPU and RAM
